the pain is
can get in the way and can rip corneas but using a rounded finger can
on the jewelry will cut back on that

I think I'm going to pass on it. I'm not planning on getting in to a long term relationship for a while so anything that could compromise

This is a Inner Labia piercing I did about 2 weeks ago with a 14g captive bead ring.

What's the pain level for his type of piercing? I have eralobe, cartilage, bellybutton and nipple piercings to compare with.

Reply

Does this type of piercing get in the way during sex? Does it rip condoms?

Reply

the pain is comparable to a nipple piercing or less, as far as in the way it can get in the way and can rip condoms but using a rounded larger ball on the jewelry will cut back on that
