

Honorable Judge Alito,

I feel daunted by addressing a Supreme Court Justice but herein appeal to you for a very specific order that will protect my honor as should be protected for all artists by the government recognizing the fundamental right to be secure in the person. It is clear that the trafficking of pornography to children, Muslim countries, and anonymous viewers is the predominant use of the Internet in the United States. I will take what I call figure-nude photographs until I die but believe no minor should ever be exposed to these. The FCC would not allow them to be shown on TV but state that regulating Internet communications by wire is outside their jurisdiction. I prepared a motion for certiorari but discovered it would not be reviewed until October. I have diligently attempted to use the legal process existing for over a year. My 14 year-old daughter, who I do not regularly communicate with, already expressed outrage that her father's name results in nude photos in image searches.

The fact that Ms Jackson now has the most famous nipple in the history of man and that most people who have no interest in football have seen a portion of the half-time presentation as presented by unregulated wire communications.

There are several issues before the court now but herein I specifically ask that nudes not be allowed as result in searches by wire for my name whether done by me or not.

Respectfully and sincerely,

Curtis J Neeley Jr.
