

Dear *Opposing* Counselors,

Please find enclosed a CD that has the files that were printed and submitted to the Supreme Court requesting an emergency Writ of Mandamus in the case now pending before the District Court. The petition for mandamus does not mention matters concerning domain names but asks for an order addressing ceasing to present nudes attributed to me before minors and the FCC nonfeasance. The Motion for certiorari was concurrently filed the first time but the court clerks misplaced the first petition for mandamus. I am sick of this case and do not wish to wait days for the Response Brief or other as should now be extremely clear to each of you.

The domain names issue is important but the defamation issue causes an emergency situation. You can use this to begin preparing your reply brief to my Brief on the Merits of a Petition for Certiorari. Both are included in this petition for your reference. There are sure to be legal errors but none as bad as denying equitable tolling and beginning limitation from the wrong date that was done by ALL of you as well as the Honorable Jimm Larry Hendren.

Printing Michael Pevin's penis photo out in color as well as the images shown by the SPECULATIVE parties was costly and I was instructed by a court clerk to just send you a CD and POST it online.

Can you tell I am upset? How much is it worth to hide sleepspot and attribute Michael Peven's erect penis photo to me? Look forward to finally seeing your response to certiorari. Mandamus is not a responsive pleading? I do not remember?

Sincerely,

Curtis Neeley
