

## Account Deletion?

Jeanette Nicole , Jun 26, 2009; 09:09 p.m.

Is there a way to delete my account?

I really do not wish to have it anymore.

I would just leave and never look back.

But I'm pretty OCD and I know in the back of my head that I have an account with posts/threads that's not being used and it drives me crazy.

Can you delete my account?

I know that it creates holes in your archives or something like that, i'm not sure on the exact effect.

But seeing as how I only posted less than 10 times and in only one thread that I posted that is not even an important contribution, would it be such a big deal?

I would just really like my account gone, and I couldnt seem to find anything regarding the subject.

Things posted to the forums, either text or pictures, usually can't be deleted since this is an archived site. As for your account, change the password to a random number you won't remember, and you won't be able to come back. You can delete any photos from your portfolio on your own.

And to repeat someone else's joke of some time back, it should be CDO not OCD.

If you go to your workspace, under "Account Options" there's a link for "unsubscribe". Though this appears to be associated with email alerts, it also actually allows you to mark your account as deleted.

Normal policy at photo.net is that forum posts are not deleted when an account is closed.
