Looking for a system to help market your property on the Internet? Our directory and reservation systems work as well for bed and breakfast or inn operations as they do for thousand room hotel properties. Your marketing dollars bring customers to your site -don't sent them somewhere else for the sale and pay high commissions.

Our flat-fee or low commission software helps you minimize or avoid franchise, GDS, and other incremental charges on your internet inventory!

SleepSpot Reservation System works with your existing internet site or standalone.

Take full advantage of your internet marketing dollars. It's a win-win situation.

SleepSpot Directory helps bring visitors to your site -and it doesn't cost a dime.
